Give the Munsell designation for the stand: paste interior- 10YR 5/2 gray brown paste exterior- 10YR 6/3 Pale Brown

Is there use wear: yes no

Describe the location and nature of the use wear if present:

The piece is: slightly - moderately - very - extremely - eroded / is not eroded.Not drawn - Drawn-where?Comments: There are a couple extremely tiny interior globules further towards ~~thick~~ the thinner edge. The interior also has a two deep horizontal grooves towards the thicker edge. The exterior has one layer of thick / flattened globules close to the back. I think this is a basal fragment (judging from thinning and the gravity effect at the basal clay).
